It is important to note that these screenings are specifically designed for those with any of the following conditions:

- * Cerebral Palsy
- * Cleft Lip and Palate
- * Club Foot
- * Leg Perthes Disease
- * Scoliosis (curvature of the spine)
- * Missing Limb(s)
- * Leg length discrepancies
- * Bone Disease
- * Spinal cord injuries
- * Osteogenesis Imperfecta – Brittle Bone Disease
- * Myelomeningocele (spina-bifida)
- * Orthopedic birth defects
- * Problems associated with burns

Shriners Hospitals
for Children™

About the Shriners Hospitals

Shriners Hospitals for Children is a one-of-a-kind health care system dedicated to improving the lives of children by providing pediatric specialty care, innovative research and outstanding teaching programs. Every year, the 22 hospitals provide care for thousands of kids with orthopaedic conditions, burns, spinal cord injuries, and cleft lip and palate in a family-centered environment, regardless of the patients’ ability to pay. It’s how Shriners Hospitals has been helping kids defy the odds since 1922.

Treatment

Nineteen Shriners Hospitals provide care for congenital and acquired orthopaedic conditions, four hospitals provide acute and rehabilitative care for burn injuries, three hospitals provide rehabilitative care for children with spinal cord injuries, and the cleft lip and palate program is expanding to multiple Shriners Hospitals. Some Shriners Hospitals offer care in more than one care specialty.

Orthopaedic Care

Shriners Hospitals for Children has been a leader in pediatric orthopaedic care since 1922. The hospitals specializing in orthopaedics are dedicated to providing medical and rehabilitative services to children with congenital deformities, problems resulting from orthopaedic injuries and diseases of the musculoskeletal system.

Burn Care

The Shriners Hospitals specializing in burns have been leaders in burn care and research since opening in the mid-1960s. Treatment is provided for burn injuries and related scarring, along with physical and emotional rehabilitation.

Spinal Cord Injury Rehabilitation

In the early 1980s, Shriners Hospitals for Children opened the nation's first spinal cord injury rehabilitation centers specifically designed for kids. There, patients find a complete range of services needed in order to recover to the fullest extent possible.

Cleft Lip and Palate Care

Cleft lip and palate was added to the health care system's treatment disciplines in 2005. Services available at Shriners Hospitals fill the need for coordinated, comprehensive multidisciplinary care for children with this condition.

Research

Shriners Hospitals for Children is dedicated to conducting innovative research to provide answers to complex medical difficulties affecting children. Shriners Hospitals' contributions to the medical community not only benefit our patients, but contribute to the overall body of medical knowledge for the care and treatment for a wide range of pediatric and adult conditions worldwide.

Education

Shriners Hospitals for Children is proud of its role in medical education. In the past 20 years, more than 8,000 physicians have received residency education or postgraduate fellowship at Shriners Hospitals. By maintaining relationships with more than 60 medical teaching facilities worldwide, Shriners Hospitals for Children fosters an academic environment committed to providing high-quality medical care to all patients.

Eligibility and Application

Children under age 18 are eligible for care at Shriners Hospitals for Children if, in the opinion of our physicians, there is a reasonable possibility they can benefit from the specialized services available. Acceptance is based solely on a child's medical needs. A family's income or insurance status are not criteria for a child's acceptance as a patient. However, Shriners Hospitals for Children accepts third-party pay from insurance companies and programs, if the family has insurance.

No appointments are necessary to attend this Application Screening at the Weld County Health Department on May 13th.
